

SW/FW Release note 2022.07.01

Introduction.

This document gives a short description of the new functions, features and bug fixes introduced in this release of DADman control software Product firmware. The released DADman is applicable for the products AX32, DX32, Penta and DAD Thunder|Core series, MOM, Avid MTRX and Avid MTRX Studio, generally denominated the Products in this document. The Firmware is divided into a version dedicated MTRX studio and a common version for the other Products.

This new release of DADman is focused on the support for the Thunder|Core enabled DAD products with the Thunder|Core option. DADman runs on Mac computers with the M1 processor using the new Apple Silicon architecture. DADman will run native on these computers but will also run on the MAC Intel based computers. DADman supports macOS 11 (Big Sur) and macOS 12 (Monterey) on both hardware platforms.

Furthermore a few new features have been added in DADman and the Thunder|Core audio driver software is now also available.

DADman control software:	v.5.6.3 build 8	New
Compatible with macOS 10.12 to 10.15 and macOS 11 and 12 with Intel or M1 processor		
DADman control software:	v.5.6.3 build 23	New
Compatible Windows 7, 8, 10 and 11		
Thunder Core driver software:		
DAD Thunderbolt 3 Core Audio Driver:	v.1.1.9.4 beta	New
Compatible with macOS 11/Big Sur and macOS 12/Monterey on Apple Silicon/M1 and Intel Computers		
Note this version is an internal release and still in beta		
ASIO Driver for Windows is not released		
Main board firmware for:		
AX32, DX32, Penta 720, Penta 721s, Avid MTRX	v.2.3.3.1	No change
Brooklyn 2 Dante module (Dante version 4.0.9.1)	v.1.0.2.1	No change
Main board firmware for:		
MTRX Studio	v.1.0.3.2	No change
MTRX Studio Dante 64 IPCore (Dante version 1.3.7.1)	v.1.0.0.4	No change

New features

The main new features are:

- Support for macOS Big Sur and Monterey Intel/M1
- Support for the DAD Thunder|Core Thunderbolt 3 enabled interfaces / modules.
- If no units are connected in DADman, the *Device List* will automatically open at DADman launch
- In the monitor profile configuration, the order of sources and outputs can be rearranged once configured
- *Import Profile* function in File menu. This function enables import of a monitor profile from any MTRX /MTRX Studio /DAD unit and makes a best fit of the monitoring configuration, and signal flow allocation etc.

Bug fixes:

- DADman didn't show labels in the fold down window when in Dark Mode. This problem is fixed.
